25 Reasons to choose Sage ERP Accpac

- 1. One unified solution on which to build your business:** enabling more efficient processing, more productive people, management of your entire customer lifecycle and the ability to gain real insight into the business.
- 2. SMB-centric:** specifically designed to meet the business management requirements of small-to-mid-sized organisations or divisions of larger companies.
- 3. Integration-ready out-of-the-box:** integrates quickly and cost-effectively with third party applications through secure, standards-based web services APIs.
- 4. CRM included:** exceptional functional breadth and depth across sales, marketing and customer service.
- 5. Modular:** deploy as needed within your organisation and add modules as your business grows.
- 6. Easy-to-use:** intuitive interfaces and quick start guides, ensure user adoption and productivity from day one.
- 7. User customisable:** personalisation capabilities provide users with instant access to the exact information they need in a format that makes sense to them.
- 8. Easy to deploy and maintain:** fully web-architected Sage ERP Accpac can be deployed quickly and cost-effectively on your own network or on-demand (hosted), and over multiple locations where required.
- 9. Flexible deployment choice:** move from on-premise to on-demand or vice versa as business requirements change.
- 10. Delivers straight-through processing:** removes the need to re-key and re-verify information as it passes between front-office to back-office environments.
- 11. Superior Architecture:** flexible & scalable to grow with your business from 1 to 250 users. Move between three Editions to scale painlessly and cost-effectively with company growth.
- 12. Low cost:** provides a low TCO for companies regardless of complexity, scale or deployment requirements.
- 13. Based on a simplified technology platform:** offering freedom of choice when it comes to server and user operating systems, as well as databases.
